Project Development Phase

Data Visualizations

Team ID	LTVIP2026TMIDS65505
Project Name	Measuring the pulse of prosperity:An index of economic freedom analysis

Preprocessing:

"Measuring the Pulse of Prosperity: An Index of Economic Freedom Analysis", preprocessing is critical to ensure reliable and comparable results across countries and time. Below are structured preprocessing steps tailored to an economic freedom index study.

Steps:

- Download the dataset
- Removed duplicate records
- Handled missing and null values
- Converted storage values into GB format
- Converted sales share into percentage format
- Standardized column names for consistency
- Combined multiple sheets into structured data models
- Changed data types (string to number, date formatting, etc.)
- Removed unnecessary columns to improve performance

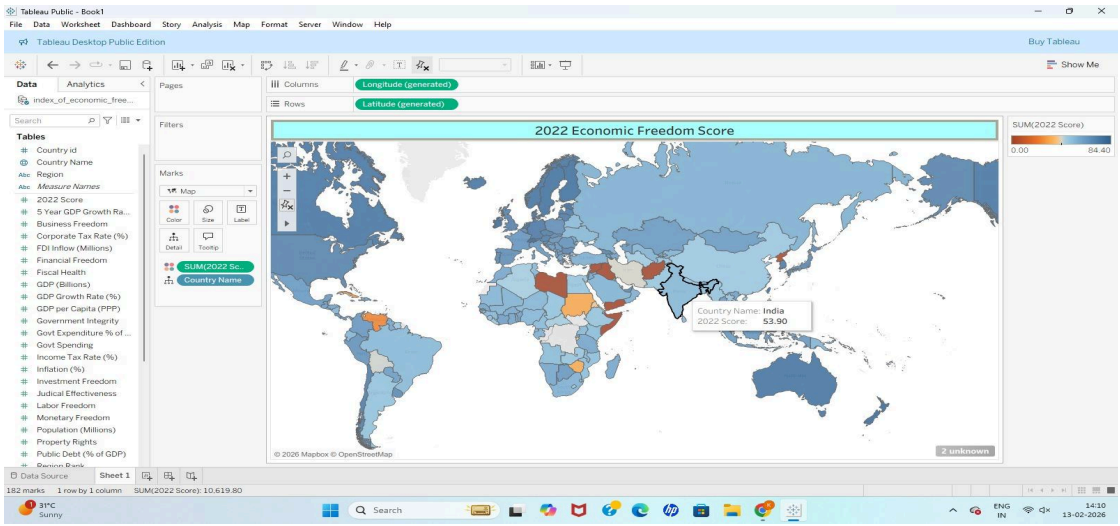
Basic Question With Visualization

- Has economic freedom improved over time, and how has this affected long-term prosperity?
- How does economic freedom vary by region, and what patterns emerge in prosperity levels?
- Which components of economic freedom (property rights, tax burden, government spending, etc.) most strongly impact economic growth?

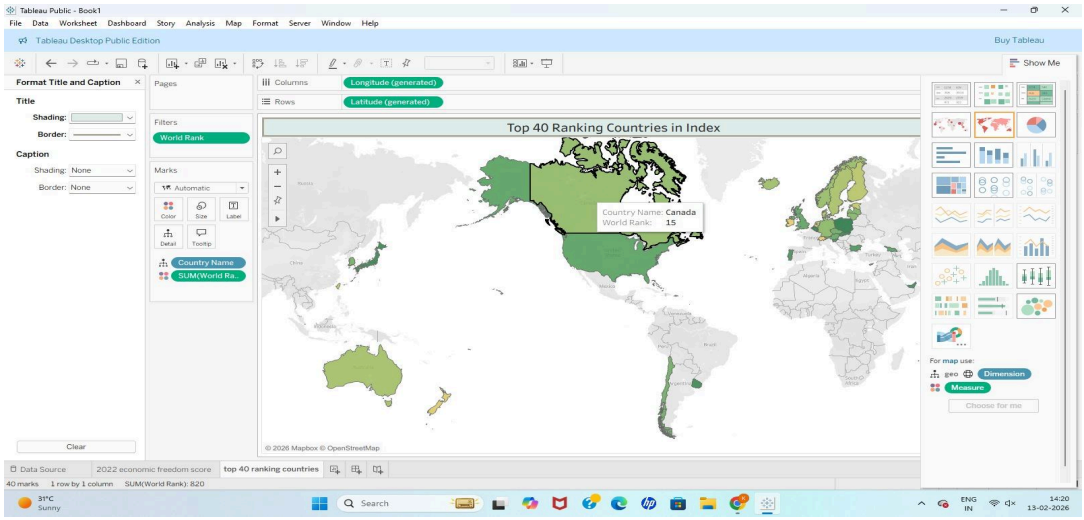
- How does economic freedom influence prosperity and economic growth across countries?
- Which countries have the highest and lowest levels of economic freedom, and how do their prosperity levels compare?

Visualizations outputs:

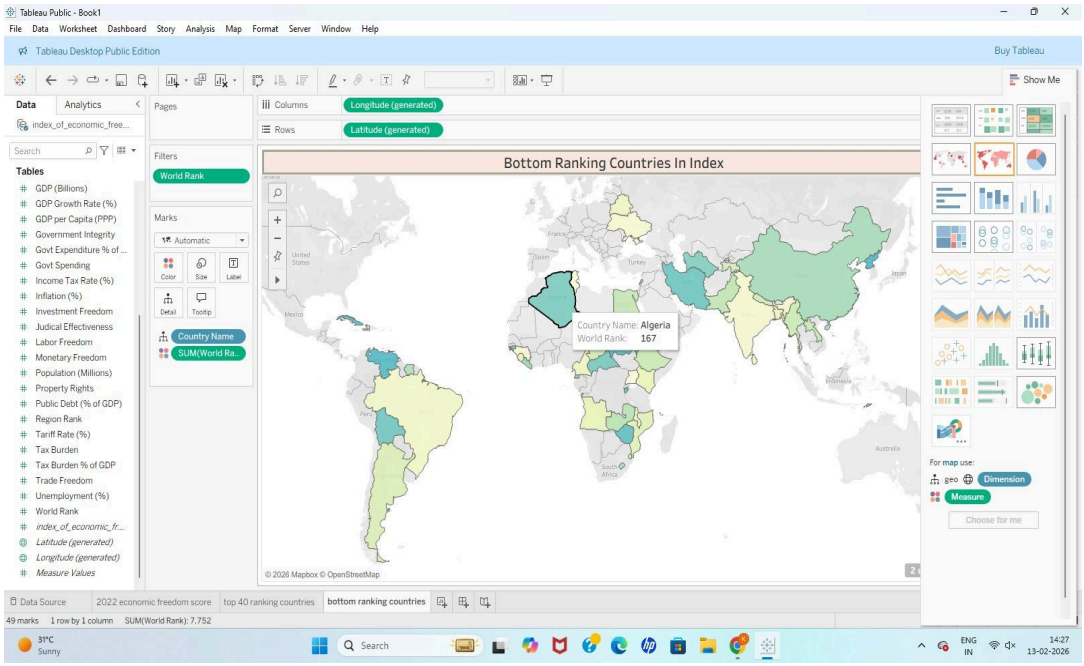
1.2022 Economic Freedom Score



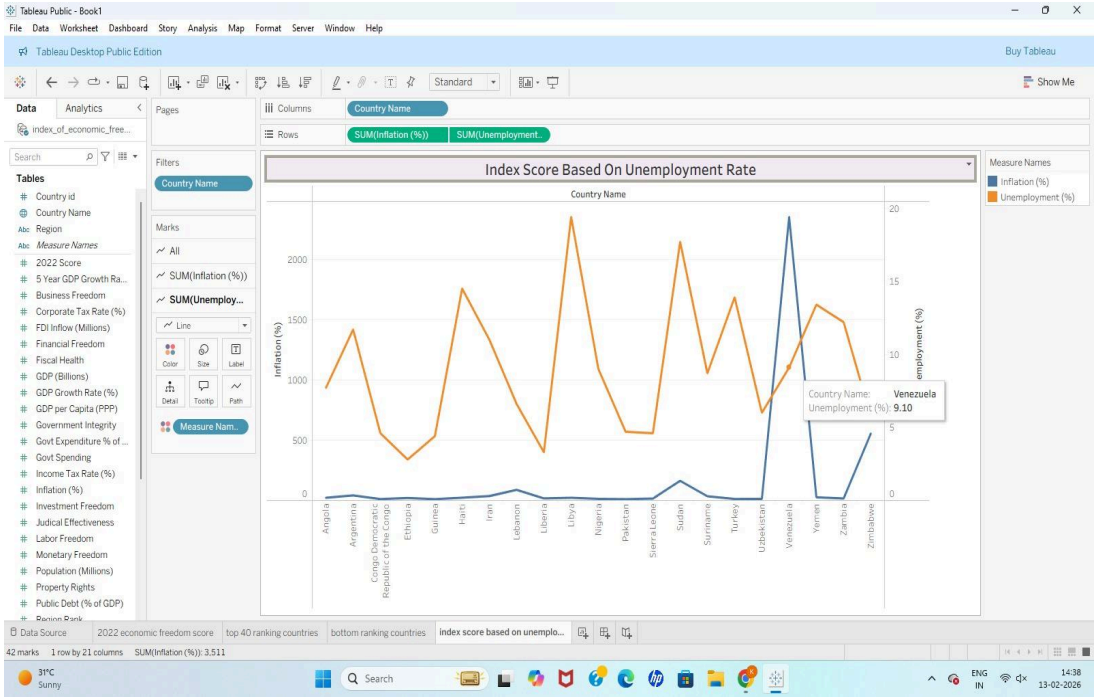
2.Top 40 Ranking Countries In The Index



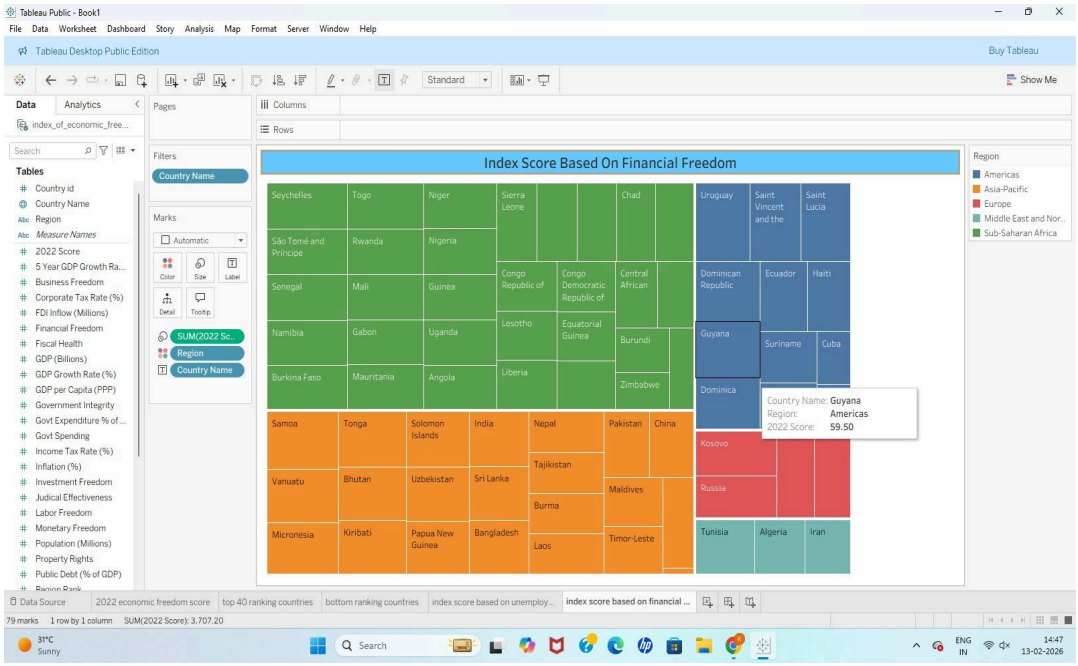
3.Bottom Ranking Countries In The Index



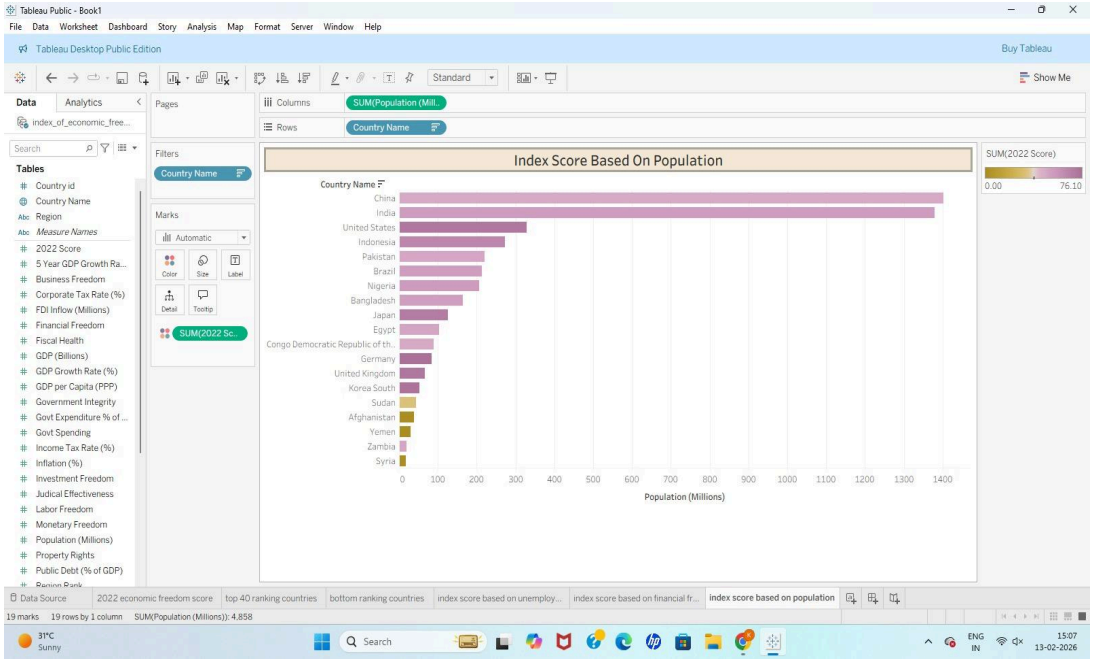
4.Index Score Based On Unemployment Date



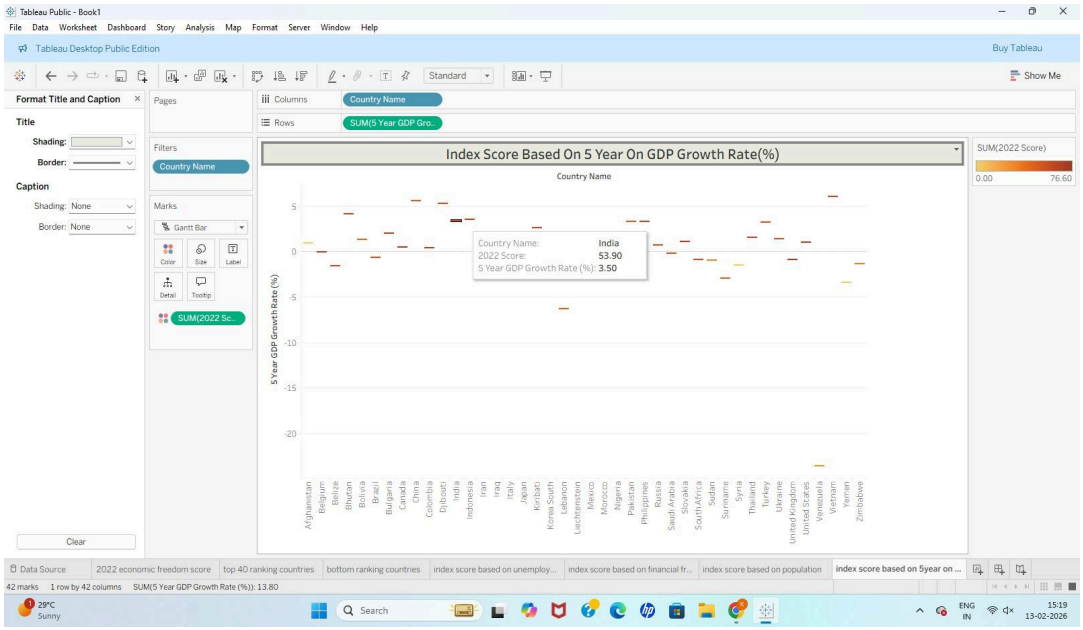
5.Index Score Based On Financial Freedom



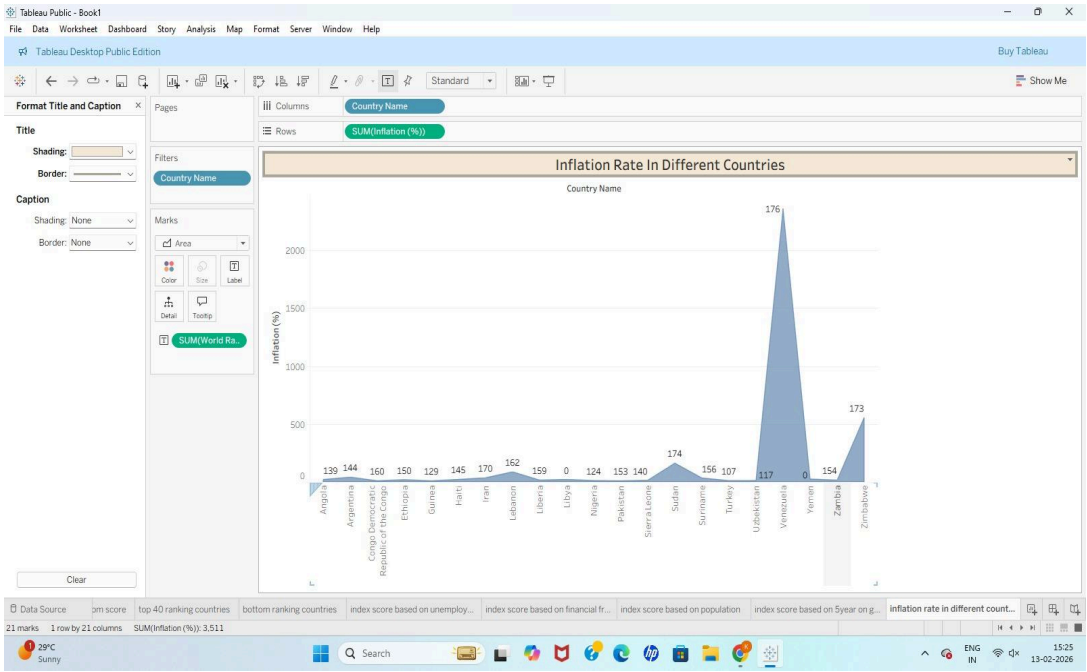
6.Index Score Based On Population



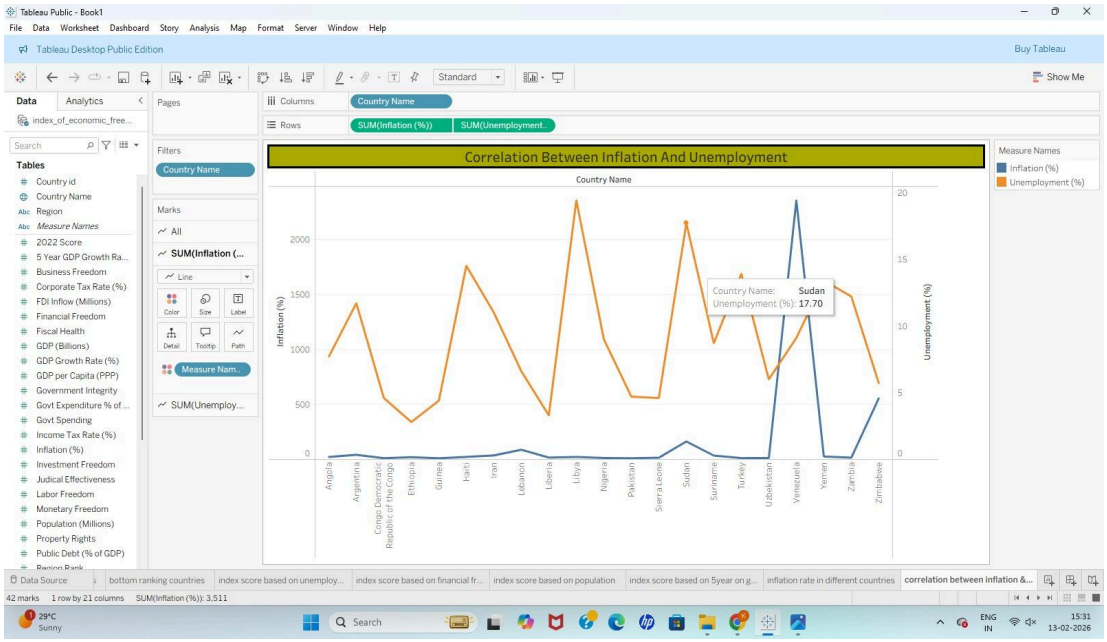
7.Index Score Based On 5 Year On GDP Growth Rate(%)



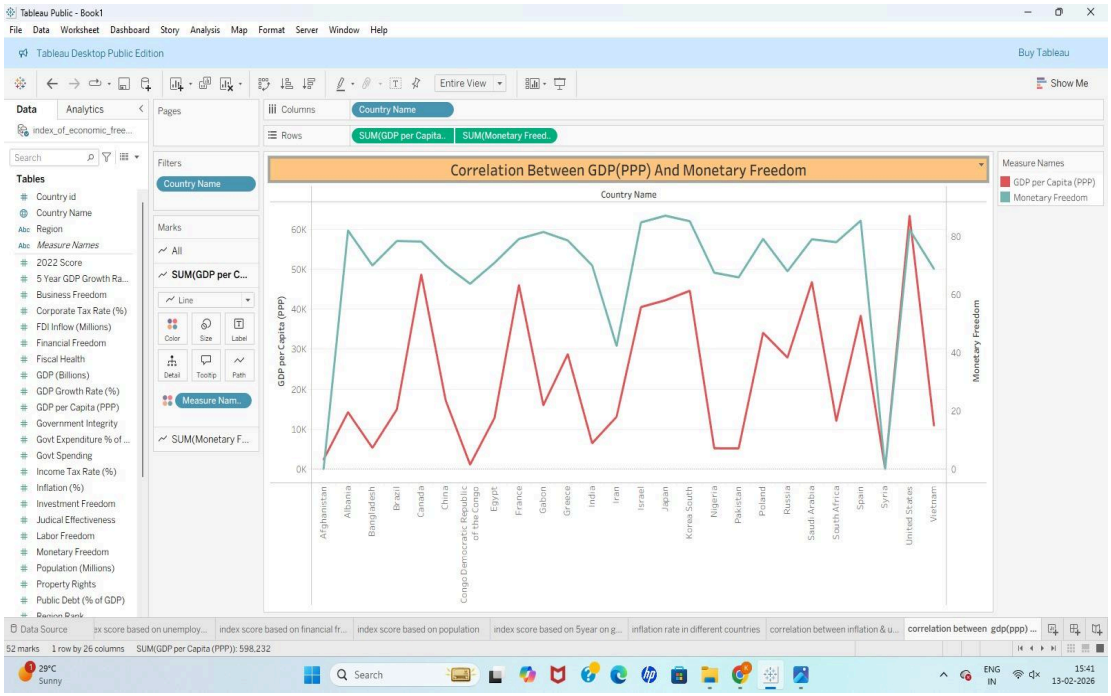
8.Inflation Rate In Different Countries

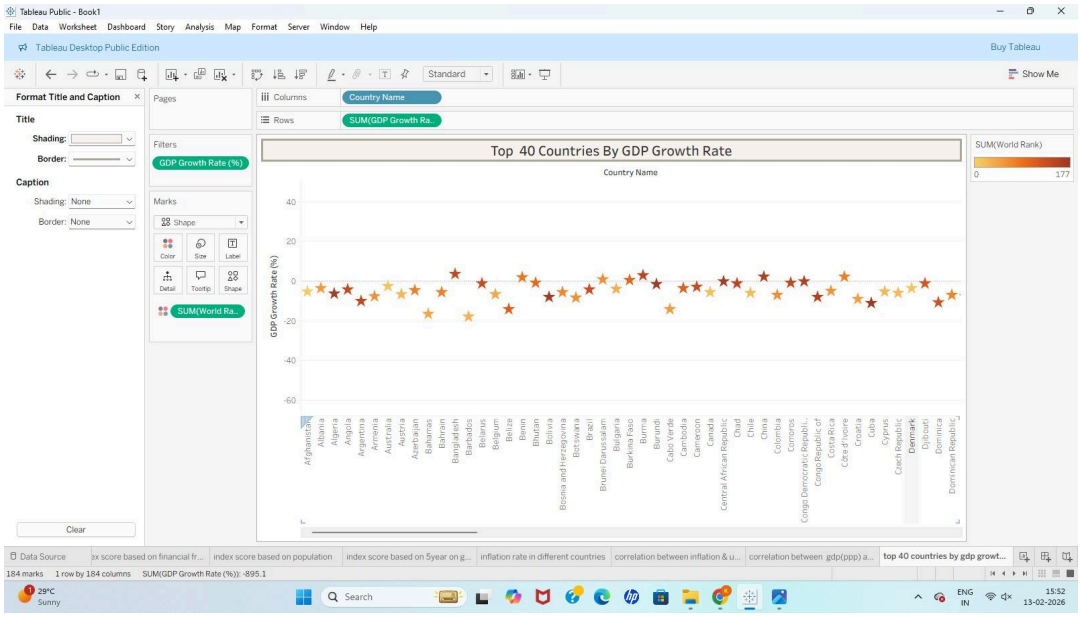


9.Correlation Between Inflation & Unemployment



10.Correlation Between GDP & Monetary Freedom





11.Top 40 Countries By GDP Growth Rate
