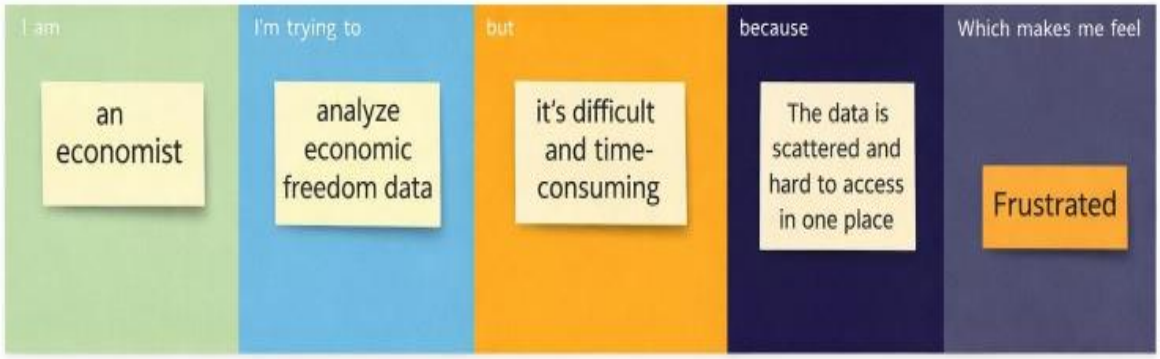
| Project Name | Measuring the pulse of prosperity:An index of economic freedom analysis |

## Customer Problem Statement

A strong customer problem statement for measuring the pulse of prosperity through an Index of Economic Freedom analysis would be:Governments, investors, and policy makers struggle to accurately measure and compare the true drivers of prosperity across countries. Traditional economic indicators such as GDP growth do not fully capture the institutional and policy environments that enable long-term wealth creation. There is a need for a comprehensive analytical framework that evaluates the degree of economic freedom — including property rights protection, regulatory efficiency, government size, rule of law, trade openness, and market competitiveness.

| | | |
|---|---|---|
| **I am** | Describe customer with 3-4 key characteristics – who are they? | **A government** official, investor, or policy maker tasked with assessing and advising on economic conditions and policies in a global context. |
| **I'm trying to** | List *their outcome or "job" they care about - what are they trying to achieve?* | **Accurately measure** and compare the true drivers of prosperity and economic freedom across different countries. |
| **but** | Describe what problems or barriers stand in the way – what bothers them most? | Traditional economic indicators like GDP growth don't **fully capture** the institutional and policy environments that enable long-term wealth creation, making it difficult to identify and address **structural issues.** (¬ra212c) |
| **because** | Enter the "root cause" of why the problem or barrier exists – what needs to be solved? | There is a lack of a comprehensive, clear, and **comparable analytical framework** that evaluates key aspects of economic freedom such as property rights, regulatory efficiency, trade openness, and the rule of law. |
| **which makes me feel** | Enter the "root cause" of why the problem or barrier exists – what needs to be solved? | There is a lack of a **comprehensive, clear**, and comparable analytical **framework** that evaluates key aspects of economic freedom such as property rights, regulatory efficiency, trade openness, and the rule of law. |
| | Describe the emotions from the customer's point of view – how does it impact them emotionally? | **Frustrated, uncertain**, and powerless to effectively evaluate economic environments, attract investment, and advocate for impactful reforms. |

**Example:**



| Problem Statement (PS) | I am (Customer) | I'm trying to | But | Because | Which makes me feel |
|---|---|---|---|---|---|
| PS-1 | a policy researcher /economics student | to analyze how economic freedom influences prosperity across different countries | I struggle to interpret and compare multiple economic freedom indicators in a clear and measurable way | the data is scattered across sources and lacks a unified analytical framework | confused and uncertain about drawing reliable conclusions |
| PS-2 | a policymaker/economic analyst | to identify which components of economic freedom most strongly impact economic growth and living standards | Find it difficult to quantify the relationship between economic freedom scores and real-world prosperity outcomes | economic performance is influenced by many interconnected variables | challenged and cautious in making evidence-based policy recommendations. |
